Category: Email notifications Estimated time: 0.00 hour Target version: Duplicate Estimated time: 0.00 hour Pescription Hi all, Is there any way to define a custom field as a list of email + value ? and if the custom field value has changed in some issues an email is sent the corresponding email ? eg: Custom field named GROUP with the following values: email group name a@eg.com g1 b@ag.com g2 c@eg.com g3 In the issue, we can select the group. When we select the group : g1, an email is sent to a@eg.com. Is there any way to do this ? Thanks for help. Regards, Aniss Related issues:	Priority:	Normal	Due date:		
Target version: Duplicate Pescription Hi all, Is there any way to define a custom field as a list of email + value ? and if the custom field value has changed in some issues an email is sent the corresponding email ? eg: Custom field named GROUP with the following values: email group name a@eg.com g1 b@eg.com g2 c@eg.com g3 In the issue, we can select the group. History

#1 - 2016-07-03 18:29 - Aniss El Amrani

Note 1:

If we have this is also ok. User name| group name| User1 | g1 | User2 | g2 | User3 | g3 |

Note 2 :

The group is nothing to have with 'Groups' of redmine.

Thanks
