Description

Hi all,

Is there any way to define a custom field as a list of email + value ? and if the custom field value has changed in some issues an email is sent the corresponding email ?

eg :
Custom field named GROUP with the following values:
email | group name|
a@eg.com | g1 |
b@eg.com | g2 |
c@eg.com | g3 |

In the issue, we can select the group. When we select the group : g1, an email is sent to a@eg.com.

Is there any way to do this ?

Thanks for help.

Regards,

Aniss

History

#1 - 2016-07-03 18:29 - Aniss El Amrani

Note 1 :

If we have this is also ok.
User name| group name|
User1 | g1 |
User2 | g2 |
User3 | g3 |

Note 2 :

The group is nothing to have with 'Groups' of redmine.

Thanks
