Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	0.7.3
Resolution:			
Description			
When you set a wiki entry title that contains an apostrophe (') char. Then preview fails due to a javascript error : the apostrophe char is not escaped in the request.			

History

#1 - 2008-12-12 13:17 - Jean-Philippe Lang

- Status changed from New to Resolved

I'm not able to reproduce with latest trunk.
The title seems to be properly escaped by a backslash in the javascript of the preview link on wiki/edit view:

```
<a accesskey="r" href="#" onclick="new Ajax.Updater('preview', '/wiki/redmine/L\'apostrophe/preview',
{asynchronous:true, evalScripts:true, method:'post', onComplete:function(request){Element.scrollTo('preview')}}
','
parameters:Form.serialize('wiki_form')}); return false;">Preview</a>
```
