Description

There was patch [#21474](#21474)
But there is mistake for "render_descendants_tree" method.
Now every child **tr** has class of current issue, but must has own

```
css = "issue issue-#{child.id} hascontextmenu #{issue.css_classes}"
```

need to be

```
css = "issue issue-#{child.id} hascontextmenu #{child.css_classes}"
```
