

Redmine - Feature #23403

Make default search scope configurable

Target version:			
Resolution:	Duplicate		
Description <p>Right now the quick search box only searches the current project. In #22125 the person asking would like to have the default changed to "current project + sub-projects". I'd be interested in setting it to "all projects", while somebody else might like to set this to default to a specific project only.</p> <p>SO I think it would be best if the admin could set the default scope of the quick search function from the admin backend.</p>

History

- #1 - 2016-07-22 14:24 - Jan S**
Duplicate of [#9909](#). Would still be great if this feature could be implemented now as well, when the search box seems to be undergoing some change soon.
