Redmine - Defect #23412

Cannot read git repository with .git in name

2016-07-23 12:15 - ruhang xu

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	3.3.0

Description
As described in the wiki for repo configuration [RedmineRepositories](#), I created a bare repository by git clone --bare.

I named it myrepo.git and setup the full path name on redmine repository setup as /var/redmine/git_repositories/myrepo.git
Suffixing by .git is a naming convention I use for all my bare repositories.

When i tried to browse it with Repository tab on my project, it failed with :
404 The entry or revision was not found in the repository

If I recreate a bare repo exactly the same way but with another name like myrepoxyz, I am able to browse it in redmine.

History

#1 - 2016-07-23 12:16 - ruhang xu

Environment :
Environment:
Redmine version   3.3.0.stable
Ruby version   2.2.5-p319 (2016-04-26) [x86_64-linux]
Rails version   4.2.6
Environment   production
Database adapter   PostgreSQL
SCM:
Subversion   1.8.10
Mercurial   3.1.2
Bazaar   2.7.0
Git   2.1.4
Filesystem
Redmine plugins:
no plugin installed

#2 - 2016-07-24 05:00 - Toshi MARUYAMA

- Status changed from New to Needs feedback

I cannot reproduce on my CentOS6 Redmine [3.3.0](#).

```
$ git --version
git version 1.7.1
```

#3 - 2016-07-24 10:08 - ruhang xu

Very sorry was a mistake from myself.
I created my initial git repo for redmine from an empty bare repo.
I have issued a git fetch but on another repo which has a very close name.

Now the results are fine when fetched correctly.
