**#6 - 2016-08-31 10:00 - Matteo Arceci**

- Status changed from *Closed* to *Reopened*

Hi,  
sorry but after upgrade files taken from [r15752](#) i can still select modules on "new project form"

steps to reproduce:

1. Administrator -> Settings -> Projects -> Role given to a non-admin user who creates a project -> "test1"
2. Administrator -> Settings -> Roles and permissions -> "test1" -> Project -> Select project modules -> UNCHECK
3. login as a "non admin" user
4. Projects -> New project

in this form Modules section still show up with the ability to select / deselect modules

same environment

Kind regards,

**#7 - 2016-08-31 11:27 - Matteo Arceci**

after some other tests i found that the problem is only in the view that still show up the "Modules fieldset"  
check / uncheck modules as no effect on the new project created

**#8 - 2016-10-10 10:09 - Jean-Philippe Lang**

- Status changed from *Reopened* to *Closed*

Sorry, I'm not able to reproduce and there's a test for this exact use case that was added with the fix.  
Make sure that you have properly applied the fix.
