Description

Recently I installed Plugin CRM AGILE PRO version 1.4.1 in my redmine version 3.2. When I realize the use of creating dashboards and clicking the "apply " button is reported an error screen named "Internal Error".

I need a help to resolve this incident.

Thanks for attention and return.

- File Re Artefatos - Melhoria.msg added

Attached this support we had Redmine CRM , which informs that our problem is in the Redmine Core , maybe the quantity of status.

#2 - 2016-08-09 04:21 - Toshi MARUYAMA

- Status changed from New to Closed

- Priority changed from Urgent to Normal

- Resolution set to Invalid

We don't provide any technical support.
