Description

Hello redmine developer,

i am using redmine and for issue tracking i am missing a feature we had in our old software.

what i am thinking of is when you create a new issue there could be a button you click on, you confirm and a screenshot is automatically added to the new issue.

this would be a thing.

I know Im using this plugin, but you have to attach it from your clipboard.
what I mean is a direct way of pasting a screenshot into your issue.

The feature was implemented in Redmine 4.1.0 (see #3816).
