Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

Running script/generate, either without parameters or with redmine_plugin generates the following error:

```
host:redmine me$ script/generate
undefined method `empty?' for /_generator$/:Regexp
host:redmine me$ script/generate redmine_plugin foo
undefined method `empty?' for /_generator$/:Regexp
```

History

#1 - 2008-12-19 03:27 - Jeffrey Hulten

Here is the tail end of ruby -d script/generate:

My script/about:

```
About your application's environment
Ruby version            1.8.6 (universal-darwin9.0)
RubyGems version        1.0.1
Rails version           2.1.2
Active Record version   2.1.2
Action Pack version     2.1.2
Active Resource version 2.1.2
```

```
Action Mailer version      2.1.2
Active Support version     2.1.2
Application root           /Users/me/Projects/redmine
Environment                development
Database adapter           sqlite3
Database schema version    101
```

#3 - 2008-12-19 04:06 - Jeffrey Hulten

- Status changed from New to Resolved

This appears to be an issue with RubyGems version 1.0.1. Upgrading to 1.3.1 fixed the issue. Version requirement should be declared in the documentation.

#4 - 2008-12-19 08:51 - Mak Babu

I can confirm the upgradation solved the problem in hand. Not sure whether it would impact any other parts of the application

#5 - 2009-01-03 14:45 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Requirement added in the wiki. Thanks for pointing this out.

```
Action Mailer version      2.1.2
Active Support version     2.1.2
Application root           /Users/me/Projects/redmine
Environment                development
Database adapter           sqlite3
Database schema version    101
```
