

Redmine - Defect #23660

Email notification on description change without activity view entry

2016-08-25 09:27 - Anonymous

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Activity view	Estimated time:	0.00 hour
Target version:		Affected version:	3.3.0
Resolution:			
Description When an issue description is changed, this is not logged in the activity view (as described in RedmineProjectActivity). An email notification of the change is sent though. There should either be both an activity entry & email (preferred) or neither. Having only seems very confusing. Also see #13314 .
