<b>Description</b>			
If I enter repositories/entry view by clicking by file name on repositories/revision view, I cannot move to repositories/annotate view directly and I always get frustrated.			
This patch adds view/annotate/download link like same as repositories/changes.			

#### Associated revisions

##### Revision 2167 - 2008-12-22 21:33 - Jean-Philippe Lang

Show view/annotate/download links on repositories/entries and repositories/annotate views (#2367).

##### Revision 2188 - 2008-12-27 19:10 - Jean-Philippe Lang

Do not show a link to the current annotate or view page (#2367).

Simple but very useful improvement... :thumbsup:

Though, your patch misses the new partial (*app/views/repositories/\_link\_to\_functions.rhtml*). I'll upload a corrected patch-file against [r2157](#) of the trunk.

##### #2 - 2008-12-22 21:33 - Jean-Philippe Lang

- Status changed from New to Closed

- Target version set to 0.8.1

Very usefull indeed, it's committed in [r2167](#).  
Thanks.

Oh, I mistook to make patch. Thanks the new patch. And thank for JP's quick work.

But the partial I made is a little bit difrerent from it. Using 'link\_to\_if' instead of 'link\_to', not to make link to same view. It helpful to avoid confusing novice user. Please see attached image.

Indeed, that looks even better especially and probably for the novice Redmine user. Doesn't make much sense indeed to provide a link to the actual

current view... Thanks for letting know about this difference...
