Description

Hello Sir,

In redmine, if the value of (Spent time, Estimated time or Due Date) is null in the parent issue, and the values for these fields is given in the child issues, then the fields of parent issue get the values of child issue. How can I stop this auto completion values of parent issue from child issues.

Thank you

Since Redmine 3.1, you can specify if these attributes should be inherited in **Administration** -> **Settings** -> **Issue tracking**.

See #5490.

- *Resolution set to Invalid*

Please use forum for question.
Redmine 3.3 does not have "Estimated time" inheriting setting.
