Redmine - Feature #23739

Add ability to "Duplicate" / "Save as" custom queries

2016-09-01 09:31 - Maxim Krušina

Target version:			
Resolution:	Duplicate		

Description
Now, when I want to add a new custom query, which should be based on an existing one with just some slight changes, there is no way how to duplicate and/or save as modified version as a new query

Currently you can load the custom query, make the required changes in the issue list, which in essence creates a new "current query", which you can then save as a new custom query.

While there is no dedicated button for this this works pretty well, doesn't it?

Can I close this issue as a duplicate of [#3606](#)?

#3 - 2016-09-02 14:01 - Maxim Krušina

#5 - 2016-09-02 14:05 - Maxim Krušina

- Status changed from New to Closed

- Resolution set to Duplicate

From UI/UX perspective it's not so much straightforward, but yep, itg works :)
So closing this issue as duplicate
