Target version:			
Resolution:	Invalid		
Description			
Hi I didn't found anything about it.			
Is it possible to show the fixed_version/target version of an issue when retrieving the issues.json ?			
If it is already possible, I'm sorry for creating an issue, but would be pleased if anyone can tell me how it's done.

- Status changed from New to Resolved

Ok monday and too early for me ... Indeed the target version shows up in my json object - **when** I call an issue *with* a target version :P

Sorry for this obsolet one...
