Description			
<p>Thank you for developing such a wonderful tool.</p> <p>I wanted to have the link of "Planning" displayed in "Issues" by linking on side-bar as well as "Overview", and the tag of "Planning_links" existed when I confirmed "App/views/issues/_sidebar.rhtml".</p> <p>I deleted the 9-17th line, and inserted the following in the first line. ("Planning" was moved most up because of thinking that that is more natural.)</p> <pre><% planning_links = [] planning_links << link_to_if_authorized(l(:label_calendar), :controller => 'issues', :action => 'calendar', :project_id => @project) planning_links << link_to_if_authorized(l(:label_gantt), :controller => 'issues', :action => 'ga ntt', :project_id => @project) planning_links.compact! unless planning_links.empty? %> <h3><%= l(:label_planning) %></h3> <%= planning_links.join(' ') %> <%= call_hook(:view_issues_sidebar_planning_bottom) %> <% end %></pre> <p>A part of of this to quote from the 59-66th line of "App/views/projects/show.rhtml", and is putting of the hand. Though it might be not correct. Especially, part of "Aaa""call_hook...".</p> <p>Redmine version 0.8-stable r2146 Ruby version 1.8.6 (i486-linux) RubyGems version 1.1.1 Rails version 2.1.1</p>

I'm very sorry.
There was no problem when 0.8.0 was set up and confirmed.
It troubled you.
