Target version:	
Resolution:	
Description	
<p>For each changeset of the issue in the issue view, the issue referenced by the changeset with the dash sign is reloaded.</p> <p>Of course the load hits the Issue model cache, but with a lot of revisions it can still take a lot of time. I don't know how to optimise this, but the fact is that it's generally the same issue that is referenced for the issue view.</p>
