**Redmine - Defect #24000**

**z-index children menu should be greater than content**

**Description**

In Redmine 3.3.0.stable.15884 we have:

```css
#main-menu .menu-children {
  z-index:1;
}

#content {
  z-index: 10;
}
```

It should be:

```css
#main-menu .menu-children {
  z-index: 11;
}
```

Please explain more details about what the current problem is and what you expect.
Some uses have a problem that #content element is over .menu-children element.

https://github.com/makotokw/redmine-theme-gitmike/issues/31#issuecomment-255307502

I have never seen this problem in my environment.

---

File 0001-setting-z-index-of-project-menu-drop-down-to-45-abov.patch added

I agree that a z-index of 1 may be too low given the fact that #content has a z-index of 10.

I am setting the z-index to 45 now, which is above context menus but below modals which I think would make sense.

Could someone please try the attached patch and see if the problem with said theme is still reproducible?

---

Terrific! Tested and works in the following themes: default, classic, gitmike, flatly light, circle, a1, alternate

---

Thanks for testing, I am setting this as a candidate for the next bugfix release then.

---

Fix committed, thanks.
