Resolution:	Invalid	**Affected version:**	3.3.1

Description

On our Redmine 3.2 installation we recognized that after some (not identifiable) moment the "Custom Fields" Entry in "administration" leads to an

```
Internal error

An error occurred on the page you were trying to access.
If you continue to experience problems please contact your Redmine administrator for assistance.

If you are the Redmine administrator, check your log files for details about the error.
```

we hoped it was introduced by some upgrade migration problem and updated to Redmine 3.3.1 today - and it is still the same.

In the Logs is happening the following:

```
Started GET "/custom_fields" for 123.123.123.123 at 2016-10-19 12:30:40 +0200
