

Redmine - Defect #24136

Unable to delete version

2016-10-21 17:58 - Christophe Portier

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Administration	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>Since we moved to 3.2.3 we can not delete any version anymore using any account (including Admin ones). Even if the versions:</p> <ul style="list-style-type: none">• Don't have any "issue for this version"• Are not shared at all• Are in any status (closed, lock...) <p>Each time we try to delete a version, the message "Unable to delete version." is displayed and the version is not deleted.</p> <p>Here are our versions in detail:</p> <pre>Redmine version 3.2.3.stable Ruby version 2.2.5-p319 (2016-04-26) [x86_64-linux] Rails version 4.2.5.2 Environment production Database adapter PostgreSQL SCM: Subversion 1.6.11 Git 2.8.4 Filesystem Redmine plugins: no plugin installed</pre> <p>If this is a 3.2.3 defect I guess we would not be the only ones facing it. But well, maybe, a first one has to raise issues?</p>			

History

#1 - 2016-10-21 19:06 - Jean-Philippe Lang

This message means that you have either an issue that references the version (as its target version) or a value for a version custom field that references the version.

We could implement a mechanism similar to deleting a category (eg. being able to remove the references or reassign to another version).

#2 - 2016-10-25 11:25 - Christophe Portier

- Status changed from New to Resolved

You were right Jean-Philippe, thanks a lot for your help and sorry for this useless ticket (switched into Resolved as I can't reject it, but I would have if I would have been able to).

#3 - 2016-10-25 18:51 - Toshi MARUYAMA

- Status changed from Resolved to Closed
