<b>Description</b> Very often in the flow of working on an issue you want to assign the issue to the last person which had the ticket.  My suggestion is that below the << me > option a second special option with the label  << last: account_anme >>  should be added.  I call this "giving back" the <i>Ping Pong Feature</i> ;-)  What do you think about this feature request?  We have working code in our plugin to implement this. It requires a change of the principals_options_for_select application_helper and a method in the issue model which returns the id of the last assignee, based on the Journals.  and could implement a patch for this.
