

Redmine - Defect #2444

many internal server errors in 0.8.0 ...

2009-01-05 13:25 - Marco Tralles

Status:	Closed	Start date:	2009-01-05
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

add project

if i klick the **add-projects-button** (url: <http://redmine.server.tld/projects/add>) i get a

Internal error

An error occurred on the page you were trying to access.
If you continue to experience problems please contact your redMine administrator for assistance.

Rendering /home/htdocs/projekte-qbit/versions/redmine-0.8.0/public/500.html (500 Internal Server Error)

add issue

if i click to „ass issue“ i can fill in the form - but if i click **create** button the internal-server error appears.

if i repost the data by reload the page the same behavior.

but the issues are created ...

```

```

is there a way to downgrade to 0.7.3 - without the issue-management redmine is not usable ?

History

#1 - 2009-01-05 14:08 - Michael Aye

just to report that i work with a subversion 0.8.0-stable on a Suse Linux with passenger-mod here without any problems and hickups. Maybe something went wrong during upgrade/installation?

#2 - 2009-01-05 16:25 - Karl Heinz Marbaise

Hi,

the printout say "Database schema version 0" that seemed to be wrong....Have you migrated your database? Did you do an update from 0.7.3 ?

Kind regards
Karl Heinz Marbaise

- *Status changed from New to Closed*
- *Affected version (unused) deleted (0.8.0)*
- *Resolution set to Invalid*

The fact that you're getting these errors means that your config/settings.yml file is either outdated or invalid. Please use the one that is included in the 0.8.0 release then restart the app. It will work much better.
