#1 - 2016-11-30 03:23 - Mischa The Evil

- Status changed from New to Needs feedback

This seems fixed by [r15997](#), isn't it?

NB. I don't know what's going wrong with redmine.org's textile processing, but the output of the description doesn't look good...

#2 - 2016-11-30 03:55 - Go MAEDA

- Status changed from Needs feedback to Closed

- Target version deleted (3.4.0)

- Resolution set to Invalid

Thanks for pointing it out.
I missed the change.

I confirmed that it can be reproduced in latest trunk ([r16009](#)). I will create a new issue.

I confirmed that it can be reproduced in latest trunk ([r16009](#)). I will create a new issue.

FTR: I was talking about the output of the description of this issue. Additionally, it's not the only issue here on redmine.org regarding the processing of textile image syntax in issue descriptions. See eg. the description of issue [#21947](#) where images aren't rendered inline correctly. That issue is something I've seen on redmine.org more than once. However, I'm currently not able to test on Redmine instances other than redmine.org, so I can't say for sure if these issues are affecting current redmine trunk source code too instead of being an issue of this site only.
