

Redmine - Patch #245

Tracker-based Gantt & Calendar

2008-01-04 16:44 - Ehren Foss

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description This patch creates a controller for a tracker-based Gantt and Calendar view. I.e., the Gantt and Calendar are not project specific, but you can still filter by trackers. Note that the patch does not include any links to it in the rest of the application, so you may need to navigate to the URL by hand after installing the patch and logging in.
