Redmine - Feature #24526

Allow to flag selected issues status as "draft" suppressing notifications and activity-entries for this status values

2016-12-03 17:21 - Anonymous

Status:	New	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues workflow	**Estimated time:**	0.00 hour
Target version:			
Resolution:			

Description

Goal

The idea is, that you can work on a ticket as a draft, store it in between, assign it and change it, add observers etc. but until you are "really" done setting up this ticket nobody will be bothered by e-mail notifications e.g. In practice thus you can collect all necessary information and put it in the ticket in several steps or re-edit it. When you are finished you change the status to (e.g.) "assigned" and any actions on it will now trigger e-mail notifications (corresponding to the user's settings).

To achieve this, the administrator when defining the status values and workflow could flag certain status values (like "new") as "draft" thus suppressing e-Mail notifications whenever an issue has this status. Also "activity-entries" should be suppressed as they are not intended/meaningful before having finished entering all details properly for this ticket.

This does not relate to "store draft" like #2910, which can be achieved with e.g. a firefox plugin like textarea cache. It is more related to the redmine-silencer plugin and the "silencing" activated automatically depending on status.

Please let me know what you think about that.

thanks

Immanuel.
