

## Redmine - Defect #24546

### Unable to edit Workflows (POST limit)

2016-12-07 01:44 - Ewan Makepeace

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Issues workflow	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.6.1
<b>Resolution:</b>			
<b>Description</b>			
<p>I now have 35 issue statuses in one of my Redmines. Before you criticise this is because I had two and was adding a third completely separate workflows for different trackers:</p> <p>Trackers Bug, Feature, Support, Design all use a fairly standard development pipeline with 13 steps from design through final acceptance on live server.</p> <p>Tracker Recruit also has 13 steps from Invite to Interview to Acceptance or Rejection.</p> <p>My new tracker for Failure Analysis adds 10 new statuses to the list. However when I try to edit the Workflow with "Only display statuses that are used in this tracker" <b>unchecked</b> (so that I can add in my new statuses) I get the following exception:</p> <pre>Request Entity Too Large  The requested resource /workflows/edit does not allow request data with POST requests, or the amount of data provided in the request exceeds the capacity limit. Apache/2.2.31 (Amazon) Server at redmine.jawasoft.com Port 443</pre> <p>I guess the grid of 35 x 35 = 1225 posted values is too many for HTTP? I did some research and PHP typically limits to 1000, other servers to other values.</p> <ol style="list-style-type: none"><li>1. Is there a quick fix - a server setting I can change?</li><li>2. I dont feel I am using Redmine unreasonably here - but the whole Workflow UX becomes almost unmanageable when you have more than 10 or 15 statuses.</li></ol>			

#### History

Following on from my second comment...

I would recommend that statuses be put in sets and a tracker subscribe to a set of statuses so you only need to work with a subset of the available status values?

The other thing that drives me crazy (while I am on the subject) is moving status items up and down the list using those little up and down arrows. It is cute with a list of 10 but with 35 over two pages it is ridiculous...

1. Provide a "Sort by Completion %" option to quickly resort
2. Allow me to work with subsets as previously requested so that I dont have to look at unrelated statuses.
