| Description <p>I have followed the steps to install plugin for redmine from redmine official site. The information is available in brief for a user like me (who has no knowledge of programming) I am finding difficulties in installing redcase plugin. I could install the plugin but not able to see the 'test case' tab on the UI though redcase plugin gets listed under plugin section.</p> <p>It will be great if the steps to install the plugin is descriptive. if sample example issadded in the document is highly appriciated. I have used redmine ova published by turnkey and I am trying to install redcase 1.0 plugin on the same vm. My default redmine folder is located under /var/www/redmine</p> <p>thanks, Yogesh</p> | | | |
