Description

We are currently running Redmine 2.4.3.stable.12909 on Ubuntu

if we have an external URL in our Intranet Redmine, the external website can track the Intranet origin which poses a security concern.

Please let us know on how to fix this?

History

#1 - 2017-01-03 14:45 - Toshi MARUYAMA

- Tracker changed from Defect to Feature

#2 - 2018-09-22 11:58 - Go MAEDA

- Related to Feature #29660: Add Referrer-Policy header to prevent browsers from sending private data to external sites added

#3 - 2019-01-02 02:27 - Go MAEDA

- Status changed from New to Closed

- Priority changed from High to Normal

- Resolution set to Fixed

We can close this issue because Redmine 4.0.0 does not send the Referer to external sites. See #29660#note-13 for details.
