**Description**

Whilst using the Spent Time Report, I have noticed that the Week display is incorrect for the first week of 2009. I set a date range of **2008-12-17 to 2009-01-07** and set the Report to show **Weeks**. The Weeks that are displayed are:

- 2008-51
- 2008-52
- 2008-1
- 2009-2

I assume that the third week ought to show as **2009-1**

### History

#### #1 - 2009-03-26 22:12 - Anonymous

Also affects calendar. I found that problem in our redmine installation and it turns out it's related to the start of the week. Problem is that week 1 of 2009 starts on december 2008,

If you go to calendar for January 2009, the first week is week 52 of 2008, when it should be week 1 of 2009. This doesn't happen if week starts on Monday.

For any week number calculation you should use Monday as first day of week. I would submit a patch, but I don't see any quick way to fix it, I just hacked it to force monday as first day of week, regardless which language you are using.

```
>> d-=1
=> Thu, 01 Jan 2009
>> [d.cweek,d.year,d.to_s]
=> [1, 2009, "2009-01-01"]
>> d-=1
=> Wed, 31 Dec 2008
>> [d.cweek,d.year,d.to_s]
=> [1, 2008, "2008-12-31"]
>> d-=1
=> Tue, 30 Dec 2008
>> [d.cweek,d.year,d.to_s]
=> [1, 2008, "2008-12-30"]
>> d-=1
=> Mon, 29 Dec 2008
>> [d.cweek,d.year,d.to_s]
```

```
=> [1, 2008, "2008-12-29"]
>> d-=1
=> Sun, 28 Dec 2008
>> [d.cweek,d.year,d.to_s]
=> [52, 2008, "2008-12-28"]
```

More info about week counting at [http://en.wikipedia.org/wiki/ISO\\_week\\_date](http://en.wikipedia.org/wiki/ISO_week_date)

Quoting:

```
Mutually equivalent definitions for week 01 are: - the week with the year's first Thursday in it (the ISO 8601 definition)
- the week starting with the Monday which is nearest in time to 1 January
- the week with the year's first working day in it (if Saturdays, Sundays, and 1 January are not working days)
- the week with January 4 in it
- the first week with the majority (four or more) of its days in the starting year
- the week starting with the Monday in the period 29 December - 4 January
- the week with the Thursday in the period 1 - 7 January
- If 1 January is on a Monday, Tuesday, Wednesday or Thursday, it is in week 01. If 1 January is on a Friday, Saturday or Sunday, it is in week 52 or 53 of the previous year.
```

I hope this helps fixing the problem. Also, fixing #2884 would allow a quick workaround

## #2 - 2009-03-26 23:24 - Anonymous

Actually, it seems this bug can be fixed by using [Date#cweek](#) instead of Date#year:

```
=> Fri, 26 Dec 2008
>> 7.times {d+=1; puts [d.cweek,d.cweek,d.year,d.to_s].inspect}
[52, 2008, 2008, "2008-12-27"]
[52, 2008, 2008, "2008-12-28"]
[1, 2009, 2008, "2008-12-29"]
[1, 2009, 2008, "2008-12-30"]
[1, 2009, 2008, "2008-12-31"]
[1, 2009, 2009, "2009-01-01"]
[1, 2009, 2009, "2009-01-02"]
```

So in TimelogController#report change

```
when 'week'
  @periods << "#{date_from.year}-#{date_from.to_date.cweek}"
  date_from = (date_from + 7.day).at_beginning_of_week
```

to

```
when 'week'
  @periods << "#{date_from.cweek}-#{date_from.to_date.cweek}"
  date_from = (date_from + 7.day).at_beginning_of_week
```

**#3 - 2010-07-21 00:00 - Holger Just**

- Status changed from New to Closed

- Resolution set to Duplicate

This issue is being worked in in #5329.

Unfortunately, there are some more subtly difficulties to solve...
