Resolution:	Invalid		

Description

Hi everyone !

First I'm new into Ruby/rails world and Redmine.
I'm trying to deploy Redmine on my personal network for my projects. I need email notifications with my office365 account so I tried the configuration which is written in the "Howto" and faced this error : "550 5.2.1 Mailbox cannot be accessed". With Gmail it works correctly but not with office365.
Yes I googled it and used all solutions that I found with the same error every time since 3 days..

My redmine informations:

Environment:

```
Redmine version      3.2.1.stable
Ruby version         2.3.1-p112 (2016-04-26) [x86_64-linux-gnu]
Rails version        4.2.6
Environment          production
Database adapter     Mysql2
```

SCM:

```
Filesystem
```

Redmine plugins:

```
no plugin installed
```

And my configuration.yml:

```
default:
  email_delivery:
    delivery_method: :smtp
    smtp_settings:
      enable_starttls_auto: true
      address: "smtp.office365.com"
      port: 587
      domain: "xxxxxxx"
      authentication: :login
      user_name: "my_address@xxxxx.com"
      password: "xxxxx"
```

I don't want to replace office365 by Gmail ;)

Thanks in advance !

Best regards,

Alex
