Redmine - Patch #247
Notification mail sender is the author and includes project information.
2008-01-08 05:34 - Hans Yoon

Description

(1) Like TRAC, each mail notification has its own header, so it helps mail client filter mails easier. The mail header is "X-redmine-project".

(2) When mail is notificated, default mail sender is fixed as administrator has defined. With this patch, most of mail message is sent from event generating user.

Associated revisions

Revision 1265 - 2008-03-16 17:52 - Jean-Philippe Lang
Add the following headers to email notifications (#830, #247):
- X-Redmine-Host: host name defined in application settings
- X-Redmine-Site: application title defined in settings
- X-Redmine-Project: identifier of the project that the notification is related to, if any
- X-Redmine-Issue-Id, -Author, -Assignee: ticket related info
- X-Redmine-Topic-Id: identifies the thread a message belongs to

History

#1 - 2008-03-16 17:55 - Jean-Philippe Lang
- Category set to Email notifications
- % Done changed from 0 to 50

Headers added in r1265.

Concerning (2), some SMTP servers won't authorize emails with a FROM adress different from the one used for authentication. It could be an option but not the default behaviour.

#2 - 2009-10-19 10:47 - Patrik Kullman
Can these also be used in incoming emails to override Project etc in the header instead of the mail body?

#3 - 2010-01-25 10:43 - Ryan Phung
Any idea whether (2) can be added as optional behaviour?
It will be a very nice feature, and will allow notification to be done more effectively.

In big project teams, when people receive a lot of email they usually filter their email by sender (for example, give more priority to email sent from the boss, from customers, etc.); it is difficult to make the transitions to using Redmine because one cannot filter his/her messages the same way anymore. To rely on Redmine notifications, one has to read every email.

#4 - 2010-01-25 10:45 - Ryan Phung
- Assignee set to Jean-Philippe Lang

Changed "Assigned to" to Jean-Philippe Lang (I hope this mean this patch will be brought to your attention). Apologies if this is not the correct way of doing it.

#5 - 2010-02-10 02:57 - Eric Davis
- Assignee changed from Jean-Philippe Lang to Eric Davis

I have some code that does this already. I'll need to see if I can extract it and make it optional.

#6 - 2010-04-07 01:08 - Brenton Cheng

Hey Eric,

We're very interested in this functionality. Possible to post here? Whatever you've got would be useful.

Thanks!
-Brenton

#7 - 2010-04-29 23:45 - Jean-Philippe Lang

Another option is proposed in #5405. So the Form field could be one the following:
- redmine@example.com (current behaviour, a single configured emission address)
- John Smith <redmine@example.com> (the emission address with the user name)
- john.smith@foo.bar (the user email address, as it's done in the attached patch)

A setting could be added to choose between these 3 options.

#8 - 2010-07-16 14:53 - Vladimir Dzalbo

looks cool.. but the patch is rather outdated...

is that possible to have a similar patch for current trunk?
#9 - 2010-10-25 17:00 - Eric Davis
- Assignee deleted (Eric Davis)

#10 - 2015-12-02 09:51 - Sebastian Paluch
+1

#11 - 2015-12-30 16:49 - Toshi MARUYAMA
- Related to Feature #14727: Display pretty notification email sender name added
