<b>Resolution:</b>	Invalid		
<b>Description</b> "Edit" a Comment clears the text of the comment (it gets hidden). reloading the page shows the text again. See Screenshot. Is that an update-error or might there be an error within redmine?  I use: <ul style="list-style-type: none"><li>• ruby_1.8.7 (2008-08-11 patchlevel 72) [i486-linux]</li><li>• mysql: 5.0.51a-19~bpo40+1 (Debian)</li><li>• how to find out the rails version??</li><li>• redmine 0.8.0.stable (MySQL)</li></ul>			

History

#1 - 2009-01-11 11:47 - Jean-Philippe Lang

Clicking on 'Edit' should make the comment editable, with an ajax request.  
Can you post the application log and give your browser version.

#2 - 2009-01-12 18:21 - Sepp \_

- Status changed from New to Resolved

Solved the problem.  
the changed .htaccess files locked some directory's on my apache to lightpd-proxy.  
After that, the error still exists. another firefox-browser-cacheflush was necessary.

Thanks for all your work and sorry for wasting your time!

#3 - 2009-01-12 18:55 - Jean-Philippe Lang

- Status changed from Resolved to Closed  
- Resolution set to Invalid

OK, thanks for the feedback.
