**Description**

Wanted to report an issue that seems to be occurring using Edge (latest), Chromium (latest stable), & Chrome (latest stable). This is the behavior showing on 3.3.1 when the browser window is not full size and goes to a more mobile or compact view.

In Edge, the background is white and text is white/grayish and only legible when you mouse over the options
  capture14.png

In Chrome, the background is showing the same way.

In Firefox 50.1.0, the background is showing blue, with white text.

Thanks.
