Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	3.3.2
Resolution:	Invalid		
Description			
<p>when trying to upgrade to 3.3.2 I get the following error:</p> <pre>root@host:/var/www/redmine-intern/redmine# ruby --version ruby 1.9.3p484 (2013-11-22 revision 43786) [x86_64-linux] root@host:/var/www/redmine-intern/redmine# rake --version rake, version 12.0.0 root@host:/var/www/redmine-intern/redmine# rails --version Expected string default value for '--rc'; got false (boolean) Rails 4.2.7.1 root@host:/var/www/redmine-intern/redmine# bundle exec rake db:migrate RAILS_ENV=production Your Gemfile lists the gem simplecov-rcov (>= 0) more than once. You should probably keep only one of them. While it's not a problem now, it could cause errors if you change the version of just one of them later. rake aborted!
