

Redmine - Defect #2486

failed during upgrade from 0.7 --> 0.8, at db migration

2009-01-10 11:15 - aeron chang

Status:	Closed	Start date:	2009-01-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Projects	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

Today the redmine has stopped working. I thought dreamhost has changed something, which they did. They have upgrade the rails to 2.2.2, but in the environment.rb, it says 2.1.2; so I have manually changed it. Still not working >_<

I decided to upgrade it to latest version 0.8. Followed the upgrading guide and failed during DB Migration. I have screen capture the --trace of migration.

Ruby Info

```

History

#1 - 2009-01-10 11:17 - aeron chang

the error is displayed on my company's site:

<http://manage.honixtech.com/projects>

#2 - 2009-01-10 11:38 - Jean-Philippe Lang

- Status changed from New to Closed

- Affected version (unused) deleted (0.7.3)

- Resolution set to Invalid

- Affected version deleted (0.7.3)

Sorry but this is not a defect in the db migration script.

Redmine 0.8.0 requires Rails 2.1.2 as stated [here](#). Simply changing RAILS_GEM_VERSION to '2.2.2' in environment.rb won't make it automagically work with Rails 2.2.2.

If Rails 2.1.2 gem is not available on your host, freeze Redmine with Rails 2.1.2.

Try to get some help in the forums if you're having trouble with it. Thanks.
