Target version:

Resolution: Invalid Affected version:

Description

Today the redmine has stopped working. I thought dreamhost has changed something, which they did. They have upgrade the rails to 2.2.2, but in the enviornment.rb, it says 2.1.2; so I have manually changed it. Still not working > <

I decided to upgrade it to latest version 0.8. Followed the upgrading guide and failed during DB Migration. I have screen capture the --trace of migration.

```
(See full trace by running task with --trace)
[pizarro]$ rake db:migrate RAILS_ENV="production" --trace
 (in /home/.amethyst/manageadmin/redmine-0.8)
 ** Invoke db:migrate (first_time)
       Invoke environment (first_time)
 ** Execute environment
rake aborted!

History

#1 - 2009-01-10 11:17 - aeron chang

the error is displayed on my company's site: http://manage.honixtech.com/projects

#2 - 2009-01-10 11:38 - Jean-Philippe Lang

- Status changed from New to Closed
- Affected version (unused) deleted (0.7.3)
- Resolution set to Invalid
- Affected version deleted (0.7.3)

Sorry but this is not a defect in the db migration script.

Redmine 0.8.0 requires Rails 2.1.2 as stated here. Simply changing RAILS_GEM_VERSION to '2.2.2' in environment.rb won't make it automagically work with Rails 2.2.2.

If Rails 2.1.2 gem is not available on your host, freeze Redmine with Rails 2.1.2.

Try to get some help in the forums if you're having trouble with it. Thanks.
