Description

"items" is translated as "□□" in Redmine, and also "columns" is translated as the same term "□□".

In my opinion, "□□" means "column" rather than "line". So, I think that using "□□" as a translation of "items" in the following strings is not very appropriate.

- notice_gantt_chart_truncated
- setting_feeds_limit
- setting_gantt_items_limit
- notice_import_finished
- notice_import_finished_with_errors
