

Redmine - Defect #24925

setting wiki page for a project version invalidates all version links

2017-01-26 08:11 - Pavel Kveton

| | | | |
|---|---------|--------------------------|-----------|
| Status: | Closed | Start date: | |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | 3.3.1 |
| Resolution: | Invalid | | |
| Description | | | |
| in the project settings (Settings->Versions), as per the attached screenshot: | | | |
| in the first column ("Version"), you can click on the version (e.g. 3.1.0.p9, link https://myseerver/versions/186) and get the list of issues targeting this version). | | | |
| When I open the version settings ("Edit" in the last column) and fill in the "Wiki page", the link https://myseerver/versions/186 becomes invalid (see "invalid page" screenshot). | | | |
| When I empty "Wiki page" for the version, the link becomes valid again. | | | |
| I'm not sure where the link https://myseerver/versions/186 should point when the version wiki page is filled, I'd expect it still should show the list of the issues. | | | |

History

Could you paste the error log in log/production.log file?

#2 - 2017-01-26 22:09 - Pavel Kveton

sorry for delay, took me longer than I expected to find it ;-). version/146 = one of the versions with Wiki Page specified:

```
Started GET "/versions/146" for 82.117.133.194 at 2017-01-26 21:12:35 +0100
Processing by VersionsController#show as HTML
  Parameters: {"id"=>"146"}
  Current user: pkveton (id=53)
  Rendered plugins/advanced_roadmap/app/views/versions/show.html.erb within layouts/base (2.5ms)
Completed 500 Internal Server Error in 540ms (ActiveRecord: 49.3ms)
```

```
ActionView::Template::Error (No route matches {:action=>"edit", :controller=>"wiki", :id=>#<Project id: 1, name: "Qorus", description: "", homepage: "", is_public: false, parent_id: nil, created_on: "2013-06-10 11:27:52", updated_on: "2013-06-10 13:19:24", identifier: "qorus", status: 1, lft: 9, rgt: 18, inherit_members: false, default_version_id: nil}>, :page=>"Qorus_version_310"}):
```

```
 1: <div class="contextual">
 2:   <%= link_to_if_authorized l(:button_edit), {:controller => 'versions', :action => 'edit', :id => @version}, :class => 'icon icon-edit' %>
 3:   <%= link_to_if_authorized(l(:button_edit_associated_wikipage, :page_title => @version.wiki_page_title), {:controller => 'wiki', :action => 'edit', :id => @version.project, :page => Wiki.titleize(@version.wiki_page_title)}, :class => 'icon icon-edit') unless @version.wiki_page_title.blank? || @version.project.wiki.nil? %>
 4:   <%= call_hook(:view_versions_show_contextual, { :version => @version, :project => @project }) %>
 5: </div>
 6:
app/helpers/application_helper.rb:48:in `link_to_if_authorized'
plugins/advanced_roadmap/app/views/versions/show.html.erb:3:in `_plugins_advanced_roadmap_app_views_versions_show_html_erb__4035772425503105859_110654900'
lib/redmine/sudo_mode.rb:63:in `sudo_mode'
```

I hope this helps - if you need more info, pls let me know...

#3 - 2017-01-27 00:27 - Go MAEDA

- Category deleted (Project settings)

- Status changed from New to Closed

- Resolution set to Invalid

Maybe the problem is caused by advanced_roadmap plugin.
I think that the plugin on your server does not support Redmine 3.3.

Please contact the author of the plugin.
