

Redmine - Feature #24942

Additional "Group by results" option for parent task

2017-01-27 21:43 - Simon Cruise

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Target version:			
Resolution:	Duplicate		
Description			
<p>The way our issues are organised is that all issues belong to a parent task, each release has a parent for all of the major items.</p> <p>We then have a summary search view which currently has a search for Parent set to none which allows only the parent tasks to be displayed.</p> <p>To view all subtasks related to each feature the user is forced to click into the parent and view in there or else perform a search for items with that Parent.</p> <p>To improve the user experience for our use case it would be really helpful if the Group by results would have the Parent Task option.</p>
