| <b>Description</b><br>I just created new poject "ČATA", but it's listed at the end of the project list.<br>It should be just after C: AĀBCČDĎ...<br>This should be implemented at least in Czech locale, but it will be very helpfull to have configurable language and sort-order independetely.<br>For example: I always preffer to have application in English, but I'm using czech locale, ie. czech names of days, months, time format, sorting, etc. |        |                   |            |

IMHO it can be placed in /my/account just under Time zone, something like "Sort order":

- (Language default)
- Czech
- English
- ...
