- File coderay-1.1.0_1c.zip added

#2 - 2017-06-15 18:03 - Mischa The Evil

- Subject changed from I would like to be able to have a list of highlighted code markup 1C: Enterprise to Add '1C: Enterprise'-languages to the code highlighting toolbar button
- Status changed from New to Closed
- Resolution set to Invalid

I just came around this issue. AFAICS it is requesting to add additional languages¹ (which are not [yet] integrated in CodeRay) to the code highlighting toolbar button.

This should not be implemented in Redmine until support for these is added to the CodeRay library itself.

This leaves the OP with two options:

1. request the addition of support for these languages in the CodeRay tracker (via an issue or a PR) itself (<https://github.com/rubychan/coderay>):
2. patch <source:trunk/public/javascripts/jstoolbar/jstoolbar.js@16664#L378> yourself (add your languages to the codeRayLanguages array and use it according to [#14937#note-6](#)).

I'm closing this issue for now.

¹ 1C:Enterprise language & 1C:Enterprise query language
