

## Redmine - Patch #2510

### [SCM, Bazaar] Prefer revision's "author" field over "committer" if available

2009-01-14 18:58 - Daniel Schömer

<b>Target version:</b>	
<b>Description</b> I'm using the Bazaar SCM Adapter. Some revisions have the author field set to show that the committer of that revision was not the author of that change. This info is given by the --author option of Bazaar's commit command.  The current Bazaar SCM Adapter always uses the committer field to set the author of a revision.  I like the Bazaar SCM Adapter to prefer the author field over the committer field, if the author field is set. The attached patch changes lib/redmine/scm/adapters/bazaar_adapter.rb accordingly.
