

Redmine - Defect #25222

404 error when visiting project's repository tab without a main repository

2017-02-28 19:32 - Lluís Vilanova

Status:	Needs feedback	Start date:	
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description I have a newly created project with some repositories, but none of them is marked as "main". If I now go to the repository tab, redmine shows a nice error page, saying it could not find an entry or revision in the repo (number 404). More importantly, the non-main repositories do not appear on the side-bar, where they usually are. If I create an empty main repository using git the error persists, since git has no initial commit in it. Only after I do some initial commit on the main repo, I can see the list of sub-repos in that project.			

History

#1 - 2017-02-28 21:09 - Jean-Philippe Lang
- Status changed from New to Needs feedback

With no repository set as default, the Repository tab should not even be displayed. Did you change this behaviour?
