<b>Target version:</b>		<b>Affected version:</b>	
<b>Resolution:</b>	Fixed		
<b>Description</b>			
Like this (I'm using Gmail from Google Apps for domain):  <a href="mailto:noreply@redmine.org">noreply@redmine.org</a> to bcc: jgoerzen, bcc: jonathan.monah., bcc: edavis, bcc: sto+redmine, bcc: jim, bcc: Armadillo1973, bcc: captain08, bcc: ricar Redmine - Open discussion: pre-built 'gem' Thomas D  Quick disclaimer: I've never dealt with ruby before, and Redmine is the only app I have that uses it. I've had Redmine for a couple days.  I was trying to do the following: "gem install mysql", but on a virtual environment where I don't want GCC installed; is there a way to either get pre-built files (I couldn't find anything regarding this) or build the files on another environment and move them?			

#### History

##### #1 - 2009-01-30 14:25 - Anonymous

- Target version set to 0.8.1

This is a security issue and should be addressed ASAP. Please can this be included for 0.8.1? I've just posted a similar comment as this was mentioned briefly in [#1904](#).

##### #2 - 2009-01-30 14:27 - Anonymous

It isn't just gmail. I use Mail.app on OS X 10.5 and can see all the e-mail addresses of everyone in the BCC list when I get an e-mail about a ticket from Redmine.org. When I send e-mails from Mail.app, the BCC'd recipients can't see the other bcc'd e-mail addresses so there is something odd regarding the mail format sent from Redmine that is preventing the BCC line from being hidden (as it should be).

Cheers

Russell

##### #3 - 2009-01-31 12:23 - Jean-Philippe Lang

After some investigations, this problem was not due to Redmine but to [ar\\_mailer](#) that I used on redmine.org to send emails asynchronously. Tests showed that without ar\_mailer, received emails don't disclose recipients. So I changed a few things on redmine.org and everything seems OK now.

##### #4 - 2009-02-02 19:35 - Jean-Philippe Lang

- Category changed from Forums to Email notifications

- Status changed from New to Closed

- Target version deleted (0.8.1)

- Resolution set to Fixed

Target version removed since it was not a Redmine defect.
