

## Redmine - Feature #2549

### Enable the watching of news

2009-01-20 22:16 - Brad Beattie

<b>Status:</b>	Closed	<b>Start date:</b>	2009-01-20
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>	News	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.5.0		
<b>Resolution:</b>	Fixed		
<b>Description</b>			
At the moment, users can't watch news items. They can subscribe the the provided feeds, but they can't get emails like they do tickets.			
I don't know Ruby, but I see the "acts_as_watchable" property that the board, message and issue models have. I gather adding this to news wouldn't watch all news, just a singular news item. Anywho, I leave the implementation details to the Redmine experts. :)

#### Associated revisions

##### Revision 12866 - 2014-02-09 12:54 - Jean-Philippe Lang

Enable the watching of news (#2549).

##### Revision 12868 - 2014-02-09 13:01 - Jean-Philippe Lang

Display watch link only when inside project with logged-in user (#2549).

##### Revision 12870 - 2014-02-09 17:34 - Jean-Philippe Lang

Test failure with Postgresql+ruby1.8 (#2549).

#### History

##### #1 - 2009-02-20 10:49 - Robert Pollak

I also would like to watch a project's news.

##### #2 - 2009-05-27 16:40 - Michael Ball-Marian

Agree his feature is important. News/Files should either be watchable, or have their own account checkbox, separate from the issues emails. Right now you have to enable notification for everything just to get News updates.

##### #3 - 2009-07-15 09:15 - Anonymous

+1 for this feature too. Currently I still have to send an e-mail around about new releases. It would be good if the 'news' section could do this automatically.

##### #4 - 2009-08-21 13:23 - vel pandian

As an admin i want to put people who can watch project news, file/document uploads

##### #5 - 2009-08-27 23:20 - Ted Lilley

+1 as well. Email updates are particularly appropriate for the news module, as the first thing you're going to want to do is follow up the announcement by sending it directly to the concerned parties.

A Redmine noob (meaning I don't know how to implement anything),

Ted

##### #6 - 2009-09-01 10:36 - Jim Mullis

Another extremely useful benefit of this feature combined with the user Group feature is the ability to create News and Info Projects that are watched by one or more customer groups, i.e. AllCustomers, GrpACustomers, GrpBCustomers, etc. It then becomes easy to announce product enhancements, planned outages, etc.

**#7 - 2009-09-30 16:49 - Randy Syring**

+1

**#8 - 2009-10-09 20:39 - Jose Luna**

+1 This would be very helpful and (I think) not too painful to implement. As Jim Mullis points out, it would be very powerful to include this in addition to groups.

**#9 - 2009-11-06 13:05 - Alfredo Bonilla**

+1

Just to confirm, that it would be really useful specially for projects with more than a couple of people working, to receive news without receiving all the modifications in the issues.... really useful

Right now, in our project, we have to send an email to the people instead of using the News to avoid that people "track" all the issues mods

**#10 - 2009-12-01 08:03 - Dennis Gao**

+1

Currently I still have to send an e-mail around about new releases. It would be good if the 'news/files/documents' section could do this automatically.

When I add the documents, add news, add files, we can not receive the e-mail.

I have checked all the Administration/Settings/Email notifications/

News added = Yes

Document added = Yes

File added = Yes

and restart apache2, I still have not received e-mail.

+ 1

**#12 - 2010-04-15 01:28 - F Delehal**

+1, this would be very helpful

**#13 - 2010-04-19 22:27 - Ted Lilley**

As a brutally ugly hack, I made my installation send email notifications about added news to all project members regardless of their notification settings. You can see my article about it here:

<http://blogs.trekforth.com/2010/04/patching-redmine-08x-for-email.html>

I'm not advocating that anyone use this approach, I'm simply waiting for a better solution.

related to [#4700](#)

**#15 - 2010-08-10 17:12 - Luis Quintero**

+ 1

Please, add watching to News and Documents. It would be a really nice feature!

**#16 - 2010-09-02 19:42 - Andrew Sherman**

+1

**#17 - 2010-09-09 12:49 - Dmitry Pupinin**

Solution here:

<http://www.redmine.org/boards/2/topics/10744#message-15485>

**#18 - 2010-09-09 15:41 - Bruno Medeiros**

- File *news\_to\_all\_members.diff* added
- Assignee deleted (*Jean-Philippe Lang*)

I created a patch with the Dmitry's solution, it's attached.

It's created against Redmine 1.0.1, and seems to be working fine.

The option 'Don't notify my of my own changes' is still working after this patch, don't know if it is expected.

**#19 - 2010-09-29 19:58 - Ciprian Hodorocea**

I have applied this patch but unfortunately, it doesn't seem to work for me. Although emails are sent for other events, nothing is sent out for news added.

Could you please suggest where I should be looking / what could be wrong?

Thx

**#20 - 2010-09-29 21:07 - Ciprian Hodorocea**

Ok, it worked for me as well after I marked "News added" under Settings > Email notifications.

Thank you

**#21 - 2010-09-30 08:22 - Terence Mill**

Please move that feature into the branch!

+1

**#22 - 2010-10-04 15:11 - Sebastian M.**

+1 please fix!

**#23 - 2010-10-27 07:04 - Ant Cunningham**

+1 from me... +100 from each of my clients :-)

**#24 - 2011-03-07 18:44 - Ryan H**

+1 .. Would be great if you want all your users to receive an email, and track it was sent.. IE. a new release or baseline available.

**#25 - 2011-03-18 08:18 - Anton Nepomnyaschih**

+1!

**#26 - 2011-04-01 12:18 - Stefan Bellus**

+1!

I want to use it to announce new release/important bug-fixes for all that subscribe for this information as watchers (not only to project members). My project is library that is used by other teams. I don't know who use it. I have to make possible that all teams that uses my library can get information about new releases/important bug-fixes. I think news are right solution.

I will release my library on Hudson and let hudson to send mail to add news. On redmine site I want to use

<https://github.com/titas/redmine-news-via-email-plugin>.

+1

Any plans for the feature? This is something you can do in Basecamp that is very useful.

**#30 - 2011-04-18 18:56 - Robert Schneider**

+1

Is the adding of this feature too complex? Otherwise put it into version 1.2.0 if possible, please.

**#31 - 2011-08-10 16:14 - Drew Keller**

I created a plugin that sends an email digest of project activity. This includes news items. It's not very configurable (yet), but at least it's a start: <http://www.redmine.org/plugins/digest>.

I'm new to Ruby coding, so improvement patches are welcome.

**#32 - 2011-09-08 10:22 - Michael Diederich**

+1

**#33 - 2011-09-08 10:45 - Robert Pollak**

I have filed a [corresponding issue with ChiliProject](#), the Redmine fork.

**#34 - 2011-09-08 18:31 - Nick Nguyen**

- File *redmine\_example.jpg* added

I've added the patch, and it is working. Except for when there is more than 6 people assigned to a project. The first 6 people get added to the TO: in the email, and then everyone after that gets added to the email itself. Seems like it adds a line break after the 6 people that messes up the email.

The email is also malformed. I've attached an example. Any idea how to make it from stop doing that?

**#35 - 2011-09-08 20:04 - Drew Keller**

There is a bug in TMail that affects certain email clients. See <http://www.redmine.org/issues/8751> (comments have a monkey patch to fix it).

**#36 - 2011-11-25 22:59 - Martti Laakso**

Why are there two different places to adjust the email settings anyway?

If I want to get news, I'm currently bombarded with all these issue updates I have no interest in. Just let the user use checkboxes to select what updates one wants to receive (issues, news, wiki...) and under what circumstances (member, watcher, all...), and let the administrator just set some sane defaults.

**#37 - 2011-11-26 01:22 - Terence Mill**

related to [#8241](#)

**#38 - 2012-02-26 13:22 - Andriy Lesyuk**

Need help testing my plugin which implements news subscription: <http://projects.andriylesyuk.com/projects/subscription>

**#39 - 2014-02-09 12:55 - Jean-Philippe Lang**

- Status changed from *New* to *Closed*

- Assignee set to *Jean-Philippe Lang*

- Target version set to *2.5.0*

- Resolution set to *Fixed*

Feature added in [r12866](#). It's now possible to watch project news. All watchers will be notified when a new news is added.

**#40 - 2014-02-14 09:46 - Daniel Felix**

- Related to Feature [#8241](#): *Advanced notification: per user, per project configurable schedule, event filter and notification format added*

**#41 - 2016-04-26 17:17 - Toshi MARUYAMA**

- Related to Defect [#22635](#): *Get news notification even though unwatch added*

**#42 - 2016-05-07 09:15 - Toshi MARUYAMA**

- Related to Defect [#4700](#): *Adding news does not send notification to all project members added*
