Description	
<p>Hi Guys,</p> <p>the /custom_fields.json is not available for normal project members.</p> <p>I have to validate several custom fields before submit, because redmine reject the issue if custom fields don't match the right values.</p> <p>Please make the custom_fields available for projects with the restriction to the members, so that i can set custom fields in the right way.</p> <p>Regards Tobias</p>
