<b>Description</b>			
<p>My use case: We're three guys working on some projects. Not everybody is involved in every project. But as soon as someone contributes (code, issues, wiki), he begins to be involved.</p> <p>My wish: I would like to be added as a member to all the project I contribute.</p> <p>This could probably need a config option as it changes the behavior, some users could possible object.</p> <p>Btw. two out of the last three bugs I filed were fixed after only hours. Incredible! Thank you a lot!!!</p>

You can use a plugin [Advanced Membership Management](#) which will let you achieve what you want. Everytime a new project is created, the specified users will become a member.
