<b>Description</b> Hi, just want to point you to this issue: [[ <a href="https://github.com/docker-library/redmine/issues/60">https://github.com/docker-library/redmine/issues/60</a> ]] The FAQ ([[ <a href="http://www.redmine.org/projects/redmine/wiki/FAQ#Why-does-Redmine-use-http-links-when-I-want-it-to-use-https-links-in-Apache-SL">http://www.redmine.org/projects/redmine/wiki/FAQ#Why-does-Redmine-use-http-links-when-I-want-it-to-use-https-links-in-Apache-SL</a> ]]) says to use the following header in the apache config to tell the app to redirect to https urls: RequestHeader set X_FORWARDED_PROTO 'https' This is wrong, it must be RequestHeader set X-Forwarded-Proto "https" The hyphenization has to be set correctly. Thanks

#3 - 2017-04-11 18:44 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

I added "RequestHeader set X-Forwarded-Proto 'https'" because it is not clear which is correct on Rails 3/4, Apache 2.2/2.4.
