Target version:			
Resolution:	Invalid	Affected version:	

Description

Hi,
if i select an repository from the select, an ajax request ist made and the same select-element comes back.
so i cant choose a repository. perhaps i did smth wrong.
the request uri: http://slacktop/redmine/repositories/edit/ymisms?repository_scm=Cvs
here is the ajax response from onchange:

```

Element.update("tab-content-repository", "\u003Cform action=\"/redmine/repositories/edit/ymisms\"
method
=\"post\" onsubmit=\"new Ajax.Request('/redmine/repositories/edit/ymisms', {asynchronous:true, eva
lScripts
:true, parameters:Form.serialize(this)}); return false;\"\u003E\n\n\n\u003Cdiv class=\"box tabul
ar
\"\u003E\n\u003Cp\u003E\n\u003Clabel\u003E\n\u003CESCM\u003C/label\u003E\n\u003Cselect id=\"repository_scm\" na
me
=\"repository_scm\" onchange=\"new Ajax.Request('/redmine/repositories/edit/ymisms', {asynchronous
:true
, evalScripts:true, method:'get', parameters:Form.serialize(this.form)}))\"\u003E\n\u003Coption value
=\"
\"\u003E\n\u003E--- Please select ---\u003C/option\u003E\n\u003Coption value=\"Subversion\"\u003E\n\u003ESubversio
n\u003C
/option\u003E\n\u003Coption value=\"Darcs\"\u003E\n\u003EDarcs\u003C/option\u003E\n\u003Coption value=\"Me
rcurial
\"\u003E\n\u003EMercurial\u003C/option\u003E\n\u003Coption value=\"Cvs\"\u003E\n\u003ECVS\u003C/option\u003E\n\u003C

\n\u003C/form\u003E\n");

```

script/about:

```
About your application's environment
Ruby version      1.8.7 (i486-linux)
RubyGems version  1.3.1
Rails version     2.1.2
Active Record version 2.1.2
Action Pack version 2.1.2
Active Resource version 2.1.2
Action Mailer version 2.1.2
Active Support version 2.1.2
Application root  /var/www/redmine
Environment       development
Database adapter  mysql
```

History

#1 - 2009-01-24 03:20 - Georg Nagel

ok i sent the form "onsubmit" manually via firebug

```
new Ajax.Request('/redmine/repositories/edit/ymisms', {asynchronous:true, evalScripts:true, parameters:'repository_scm=Git'});
```

then i become an error "you have to define a url" or something
but now i got a form and could add my repository :)

#2 - 2009-01-24 10:09 - Jean-Philippe Lang

I'm not able to reproduce.
Please post the application log.

#3 - 2009-01-24 11:02 - Georg Nagel

- *File production.log added*

Here's the complete log. creating project + trying to choose a SCM. the last item in the log just gives the the select response as posted above perhaps its cause im running in an subdir (/redmine/) ? for that i put "ActionController::AbstractRequest.relative_url_root = "/redmine"" into environment.rb. perhaps it has something to do with it ?

#4 - 2009-01-24 12:01 - Jean-Philippe Lang

Thanks.

```
Parameters: {"action"=>"edit", "id"=>"asdfasdf", "controller"=>"repositories", "repository_scm"=>"Cvs.html"}
```

I'm wondering why repository_scm paramter is "Cvs.html", any idea about that?
It should be "Cvs", that's why Redmine does not recognize it and doesn't show the appropriate form.

ahh okay that must be the rewrite rule of lighttpd then:
i modiefied that from conf/lighttpd.conf:

```
url.rewrite = ( "/" => "index.html", "^([^.]+)$" => "$1.html" )
```

here is my block of redmine in my config:

```
url.rewrite-once += (
  "^/redmine/$" => "/redmine/index.html", "^/redmine/([^.]+)$" => "/redmine/$1.html",
  "^/redmine/(stylesheets|javascripts|images|themes)/(.*)$" => "/redmine/public/$1/$2"
)
$HTTP["url"] =~ "^/redmine/" {
  $HTTP["url"] !~ "^/redmine/public" {
    proxy-core.protocol = "fastcgi"
    proxy-core.allow-x-sendfile = "enable"
    proxy-core.backends = ( "localhost:9001", "localhost:9002", "localhost:9003" )
    proxy-core.max-pool-size = 16
  }
}
```

That fixed it:

```
url.rewrite-once += (
  # first the static
  "^/redmine/(stylesheets|javascripts|images|themes)/(.*)$" => "/redmine/public/$1/$2",
  # dont forget the query string :)
  "^/redmine/$" => "/redmine/index.html", "^/redmine/([^.?]+)(.*)$" => "/redmine/$1.html$2"
)
```

its lighttpd 1.5 btw

thx for your help
