Currently only boolean and list custom fields are selectable as criteria in the time entries report.

It would be nice to have more custom fields types available here, for example the key/value-pair, user and fixed version types.

+1. It should be also noted that the current implementation only adds list custom fields as selectable criteria on timelog report which don't have the 'multiple values' option enabled (I wrote about this on #19121#note-1).

We also have some requests for date, int, text and long-text custom field types already (eg. #1692#note-3, #1766#note-30, #1766#note-32, #21061, and to some extent [my exhaustively extensive, historical forum post] message#2040).
